

APPENDIX 4 (online) of the paper: *Colonization Dates of Madagascar by the Four Endemic Clades of Primates, Tenrecs, Carnivores and Rodents as inferred from Nuclear Genes*, by Céline Poux, Ole Madsen, Elisabeth Marquard, David R. Vieites, Wilfried W. de Jong and Miguel Vences

Tree topology, as in Figures 2 and 4, with nodes numbered. Dating information for all nodes is given in Appendix 5. Malagasy clades are in light grey boxes, their sister groups in dark grey boxes. Black circles indicate radiations of Malagasy lineages and open circles indicate divergences from non-Malagasy sister groups.
